

Rahul - Python Developer

Location: Kerala, India (Relocating to Chennai)

Email: rahul@example.com

Phone: +91 XXXXX XXXXX

GitHub: github.com/rahul

LinkedIn: linkedin.com/in/rahul

Summary

Aspiring Python Developer with a passion for backend development and problem-solving. Currently a 1st-year college student with hands-on experience in Django, REST APIs, and full-stack development. Seeking internship opportunities and entry-level Python developer roles to apply knowledge and continue growing professionally.

Technical Skills

Languages: Python (Strong), JavaScript (Basic), SQL (Basic/Intermediate)

Frontend: HTML, CSS, SCSS/Sass, Vanilla JavaScript

Backend: Python (OOP), Django, Django REST Framework

Tools & Technologies: Git & GitHub, Postman, VS Code, Render

Databases: SQLite, PostgreSQL

Experience

Frontend & Backend Intern | Novox EdTech

Internship Period

- Built multiple frontend pages using HTML, CSS, and JavaScript including login interfaces, product UI, and basic dashboards
 - Worked extensively with Django backend framework and PostgreSQL database
 - Utilized Git for version control, including branching and stashing workflows
 - Gained hands-on experience in full-stack development processes
 - Collaborated with team members on real-world project development
-

Projects

E-commerce Cart System

Django, Python, HTML/CSS, SQLite, JavaScript

- Comprehensive e-commerce application with user authentication and product management
- Implemented secure user sessions and product catalog with search functionality
- Built complete shopping cart workflow with backend logic

Instagram Clone

Django, Python, HTML/CSS, JavaScript, SQLite

- Social media application mimicking Instagram's core features
- User profiles, post creation, image uploads, likes, and comments
- Responsive frontend design with user authentication

Banking System CLI

Python, CLI, File Handling

- Command-line banking application with admin and user menus
- User creation, authentication, and basic transaction operations
- File handling for data persistence

Django Login System

Django, Python, Authentication

- Secure user authentication system with registration and login/logout functionality
- Session management and user security implementation

Lisbon Chair Shop

HTML, CSS, Responsive Design

- Frontend UI project for online furniture store
 - Responsive design and modern web design principles
-

Education

1st Year College Student

Current

- Pursuing higher education while building practical programming skills
 - Actively solving intermediate-level Python problems and LeetCode-style challenges
 - Studying advanced Python concepts including generators, recursion, and data structures
-

Certifications

Junior Python Developer Certificate | Novox EdTech

- Recognized for backend development skills and successful project completion

Experience Certificate | Novox EdTech

- Frontend & Backend Intern role completion with demonstrated proficiency in Django and frontend technologies
-

Additional Information

- **Problem-Solving:** Actively solving intermediate-level Python problems and improving logic foundation
 - **API Knowledge:** Understanding of REST API principles (GET, POST, PUT, DELETE) and testing with Postman
 - **Version Control:** Confident using Git including stashing and branching
 - **Deployment:** Experience deploying Django apps on Render
 - **Code Quality:** Prefers writing code from scratch with minimal reliance on copied code
 - **Professional Network:** Strong reference at Olympia Tech Park, Chennai
-

Career Goals

- Become a professional backend developer
- Strengthen skills in problem-solving, logic building, and API development
- Explore advanced Python topics through continuous learning
- Gain full-time work experience in Chennai's tech industry
- Build a strong portfolio with real-world projects
