

RAHUL RAMESH

Junior Software Developer · Python · Django · FastAPI

+91 9037579459 · rahulrameshm98@gmail.com · linkedin.com/in/rahulrameshm0 · github.com/rahulrameshm0

PROFESSIONAL SUMMARY

Junior Backend Engineer with hands-on experience building scalable web applications using Python, FastAPI, and Django. Skilled in architecting database-driven systems and automation tools with a strong grasp of PostgreSQL and Git. Passionate about writing clean, maintainable code and eager to contribute to high-impact, real-world projects in a dynamic development team.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: Django, FastAPI, Tailwind CSS, Bootstrap

Databases: PostgreSQL, SQLite

Tools & Practices: Django ORM, Git, GitHub, Web Automation (Playwright)

WORK EXPERIENCE

Junior Python Developer · Novox EdTech, Calicut

Oct 2024 – Jun 2025

- Learned and applied Python, Django, HTML, CSS, JavaScript, and SQL through hands-on projects and practical assignments.
- Built multiple web development projects to strengthen backend and frontend development skills.
- Developed Django applications with user authentication, CRUD operations, and database connectivity.
- Collaborated on full-stack development tasks while following Git-based version control workflows such as branching, pull requests, and code reviews.
- Gained practical experience in debugging, testing, and deploying web applications.

PROJECTS

E-Commerce Platform | Django · Django ORM · Python

- Built a full-stack e-commerce platform with product management, shopping cart, and real-time order tracking.
- Implemented authentication and authorization using Django's auth module for customer and vendor accounts.
- Implemented a secure checkout workflow in test mode to handle simulated payments, processing transactional data.

Task Manager Application | Django · Django ORM · Python

- Engineered a task management system with per-user data isolation for creating, organizing, and tracking project tasks.
- Secured access via Django session-based authentication, ensuring tasks visible only to the authenticated user.

Budget Monitoring System | Django · PostgreSQL · JavaScript

- Built a personal finance app for tracking income and expenses with real-time balance updates via JavaScript.
- Enforced data privacy with a login-based session system ensuring financial data integrity per user account.

Chat Application | Django · WebSockets · Django ORM

- Delivered a real-time user-to-user chat system with secure private messaging using Django authentication.
- Implemented a custom database-backed validation system to enforce user security throughout message workflows.

Web Automation System | Python · Playwright · Scrapy

- Automated Excel report generation using Python and openpyxl, programmatically loading pivot table data, generating bar charts, and exporting the final workbook — eliminating manual charting work.
- Built a headless Selenium scraper to extract football news headlines, subtitles, and links from a live website using XPath, storing results in date-stamped CSV files via pandas.
- Wrote cross-browser UI test scripts using Playwright (Chromium & Firefox), covering form interactions, role-based locators, and login flow assertions to validate web application behaviour.
- Improved scraping reliability through asynchronous browser handling, automated interactions, and error management.

EDUCATION

Bachelor of Computer Applications (BCA) · Vivekananda Global University, Jaipur

2025 – 2028
